Twin display & large digits for max readability even when hiking & trapezing

Sailteck unveils the GPS Compass:

The Ultimate High-Performance Sailing Instrument

Sailteck is proud to announce the launch of the **GPS Compass**. Primary functions include: **heading, heel, trim, speed (SOG), countdown, line distance, and time-of-day**. It is also **software upgradable**, with **innovative data sharing** capabilities.

With this launch, Sailteck enters a new market. The GPS Compass is designed for sailors and sailing teams who are looking for **exceptional reliability, waterproofing and shockproofing, accuracy, response speed, clarity, all-round-visibility, continuous power, and value for money**.

Now, across two products, Sailteck serves all dinghy classes as well as day-sail keel boats.

More Powerful Data. Designed for Speed. Built for Clarity.

	Race Compass	GPS Compass
		
Compass, countdown, time-of-day	✓	✓
Solar powered	✓	✓
Floats, continuously submersible to 20m	✓	✓

Product launch will be at the RYA dinghy and watersports show Farnborough UK 21st February 2026

Sailteck will be exhibiting on the weekend of 21st/22nd February on stand E12, offering the chance to see the new product and talk with the team. The GPS Compass will be available globally from March.

Mark Johnson, Managing Director at Sailteck said:

"Bringing a better instrument to GPS-permitted classes is an important step in our journey to re-invent electronics for sailing, tracking and race management, eliminating general-recalls once and for all."

About Sailtec-

Sailteck's founder Mark Johnson was co-founder and lead developer at Tacktick which introduced the electronic tactical compass to small-boat racing nearly 30 years ago. One of the world's most experienced developers of marine electronics, he is named as inventor on over 50 patents. With Sailteck, he is once again bringing the **very latest technology** to the hands of racing sailors who strive to be first over the finish line.
